Qyx
The Intelligent Typewriter.

Qyx® The Intelligent Typewriter™

LEVEL 1:   THE WORLD'S MOST ADVANCED TYPEWRITER

For high-quality correspondence, forms, statistical and transcription typing. Qyx Level 1 does more than any other typewriter has ever done before. And it does it easier and faster.

Easier because it makes typing simple and convenient. Combining the familiar standard typewriter keyboard with many time-saving automatic functions. Such as automatic centering and decimal tab, one-key automatic erase backspace, and automatic carrier return. And, Qyx can remember frequently-used phrases and tab formats so *you* don't have to.

Faster because it does it all electronically. With fewer moving parts. For the first time, microcomputer technology has been brought to the typewriter, introducing cost and performance effectiveness never before possible. For example, since Qyx can correct as you type, your first copy is your final copy.

And Qyx is upgradable. So it won't become last year's model next year. It can grow, at any time, using add-in performance modules. Such as memory, removable memory diskettes, and Qyx-to-Qyx communication (electronic mail) capability. Qyx can be *what* you want *when* you want it. To match the changing needs of your growing business.

New technology, creative design and built-in upgradability combine to make Qyx a truly cost-effective, electronic business communications system.

- Weight: 51 lbs.

Power Requirements
- 115 vac ± 10%, 60 Hz, 3.0 amperes max.

Qyx The Intelligent Typewriter™

LEVEL 2: THE INTELLIGENT TYPEWRITER WITH MEMORY

For high-quality correspondence, forms, statistical and transcription typing, where normal revision and some editing is required. Qyx Level 2 does more than any other typewriter has ever done before. And it does it easier and faster.

Easier because it makes typing simple and convenient. Combining the familiar standard typewriter keyboard with many time-saving automatic functions. Such as automatic centering and decimal tab, automatic erase backspace, automatic carrier return, repeat keys and right-margin justification. Also, Qyx can memorize frequently-used phrases and formats for your convenience.

Faster because it does it all electronically. Using microcomputer technology, Qyx Level 2 can achieve a level of cost and performance effectiveness never before possible with a typewriter. A 10,000-character memory (approximately 5 pages of single-spaced text) provides document storage so that revision and editing can be done without retyping the entire document. Once revisions are entered, the document can be automatically printed, letter-perfect. At the touch of a button.

And Qyx Level 2 is upgradable. So it won't become last year's model next year. It can grow, at any time, using add-in performance modules. Such as more memory, removable mini-diskettes, a 24-character "window-into-the-memory" visual display and Qyx-to-Qyx or to-Vydec communication capability. Qyx can become *what* you want *when* you want it. To match the changing needs of your growing business.

New technology, creative design and built-in upgradability combine to make Qyx a truly cost-effective, electronic business communications system.

Qyx® The Intelligent Typewriter™

LEVEL 3:   THE INTELLIGENT TYPEWRITER WITH MORE MEMORY

For typing needs that include frequent revision and retyping of documents, automatic document playout and repetitive letters. Qyx Level 3 does more than any other typewriter has ever done before. And it does it easier and faster.

Easier because it makes typing simple and convenient. Combining the familiar standard typewriter keyboard with many time-saving automatic functions. Such as centering, decimal tab, erase backspace, repeat and right-margin justification. Action display indicators give you visual signals for: replace ribbon, memory full, line ending, and document maintenance in memory. And amount keys allow control of playback by page, paragraph, sentence, line, word or character. These and other features provide you with simple, logical control of memory functions.

Faster because it does it all electronically. Using microcomputer technology, Qyx Level 3 can achieve a level of cost and performance effectiveness never before possible with a typewriter.

A 60,000-character memory (approximately 30 pages of single-spaced text) provides document storage so that revision and editing can be done quickly and easily. Then, a letter-perfect document can be printed out automatically. At the touch of a button.

And Qyx Level 3 is upgradable. So it won't become last year's model next year. It can grow, at any time, using add-in performance modules. Such as removable mini-diskettes, Qyx-to-Qyx and to-Vydec communications capability and a 24-character "window-into-the-memory" visual display. Qyx can become *what* you want *when* you want it. To match the changing needs of your growing business.

New technology, creative design and built-in upgradability combine to make Qyx a truly cost-effective, electronic business communications system.

Qyx® The Intelligent Typewriter ™.

LEVEL 4: SINGLE DISKETTE TEXT EDITOR

For typing needs that include frequent revision and retyping of documents, automatic document playout and repetitive letters. Qyx Level 4 does more than any other typewriter has ever done before. And it does it easier and faster.

Easier because it makes typing simple and convenient. Combining the familiar standard typewriter keyboard with many time-saving automatic functions. Such as centering, decimal tab, erase backspace, repeat and right-margin justification. Action display indicators give you visual signals for: replace ribbon, memory full, line ending, and document maintenance in memory. And amount keys allow control of playback by page, paragraph, sentence, line, word or character. These and other features provide you with simple, logical control of memory functions.

Faster because it does it all electronically. Using microcomputer technology, Qyx Level 4 can achieve a level of cost and performance effectiveness never before possible with a typewriter. A removable mini-diskette enhances memory capacity and flexibility. Each diskette can record up to 60,000 characters (approximately 30 pages of single-spaced text), providing virtually unlimited document storage capacity. And any stored document is instantly available for revision or printout simply by inserting the proper diskette into a slot under the keyboard and keying the document number you desire. Then, at the touch of a button, a letter-perfect document can be printed out automatically.

And Qyx Level 4 is upgradable. So it won't become last year's model next year. It can grow, at any time, using add-in performance modules. Such as dual-drive, removable mini-diskettes, Qyx-to-Qyx and to-Vydec communications capability and a 24-character "window-into-the-memory" visual display. Qyx can become *what* you want *when* you want it. To match the changing needs of your growing business.

New technology, creative design and built-in upgradability combine to make Qyx a truly cost-effective, electronic business communications system.

Qyx. The Intelligent Typewriter™

LEVEL 5:   DUAL DISKETTE TEXT EDITOR

Qyx Level 5 is a dual drive, removable mini-diskette, text-editing typewriter designed to allow merging of text between two mini-diskettes of 60,000 characters capacity each. It is ideal for storage, revision and typing of longer documents or for documents which require combining of information from several storage sources. For example, adding names and addresses from a prospect list stored on one diskette to the body of a sales letter stored on another diskette. Or for combining paragraphs from several stored documents. Qyx Level 5 does more than any other typewriter has ever done before. And it does it easier and faster.

Easier because it makes typing simple and convenient. Combining the familiar standard typewriter keyboard with many time-saving automatic functions. Such as centering, decimal tab, erase backspace, repeat and right-margin justification. Action display indicators give you visual signals for: replace ribbon, memory full, line ending, and document maintenance in memory. And amount keys allow control of playback by page, paragraph, sentence, line, word or character. These and other features provide you with simple, logical control of memory functions.

Faster because it does it all electronically. Using microcomputer technology, Qyx Level 5 can achieve a level of cost and performance effectiveness never before possible with a typewriter. Dual-drive removable mini-diskettes enhance memory capacity and output flexibility, allowing portions from both diskettes to be merged to create a required document. And all this, in addition to the virtually unlimited document storage capacity provided by removable diskettes. Any document is instantly available for revision or printout by inserting the proper diskette into a slot under the keyboard and keying the desired document number. The touch of a button converts the recorded document into a letter-perfect letter. At greater than 300 words-per-minute!

A 24-character "window-into-the-memory" visual display and communications capability for Qyx-to-Qyx or to-Vydec are available to even further increase the usefulness of the Qyx Level 5. Qyx can become *what* you want *when* you want it. To match the changing needs of your growing business.

New technology, creative design and built-in upgradability combine to make Qyx a truly cost-effective, electronic business communications system.
